JOAN, P. PALMA, Ph.D.
Academic Vice-President
Notre Dame of Marbel University

Dear Dr. Palma:

Greetings.

May we respectfully request that, in addition to the presenters, the 3rd Year students of the College of Engineering, Architecture, and Computing (CEAC) be excused from their regular classes on Thursday, March 5, 2026 from 7:30 A.M. to 5:30 P.M., to allow them to participate as audience members in the upcoming CEAC Research Forum.

Their attendance in this academic event is highly significant, as they will be the next cohort to undertake their research and capstone projects in the forthcoming school year. Exposure to the presentations will provide them with valuable insights into current research trends, methodological approaches, project scopes, and presentation standards within the college. It will also serve as a benchmark to guide them in identifying relevant, feasible, and innovative research topics aligned with the thrusts of their respective programs.

Moreover, observing the forum will help them better understand research rigor, documentation processes, panel expectations, and the level of technical depth required for successful project implementation. This early exposure is expected to enhance their preparedness, academic motivation, and overall quality of future research outputs.

Rest assured that students will be advised to coordinate with their respective instructors regarding missed lessons and requirements.

Attached herewith is the list of 3rd Year students who will participate.

We sincerely hope for your favorable consideration of this request.

Thank you very much for your continued support of our academic initiatives.
